EXPERIENCE

Mentor of Data Research - Central Computer Improvement 01/2026 - Present

Mentor & Curriculum Machine Learning - GDGOC Telkom University 11/2025 - Present

Orchestrated a comprehensive 10-week "Zero to Hero" mentorship program, designing a beginner-friendly curriculum that demystifies Complex Deep Learning concepts (CNNs & NLP) and Data Science fundamentals. Guided students through the full project lifecycle—from data cleansing and model training with TensorFlow/Keras to deploying interactive web applications using Streamlit—successfully bridging the gap between theoretical knowledge and practical, industry-ready AI prototype

Build Portofolio Website With React and Tailwind 06/2025 - Present

Portofolio - Ammar Ridho ↗

Developed a dynamic single-page portfolio website using JavaScript and the React framework. Leveraged Tailwind CSS for a modern, responsive, and creative user interface design. The site showcases projects, skills, and experiences in an engaging and interactive format.

Person In Charge Data Mining Competition 05/2025 - Present

PRODIGI

Led the Data Mining Division with a focus on nurturing and developing talents to excel in competitive fields such as Data Mining, AI Innovation, and Data Analytics. Designed and executed programs to strengthen members' technical and competitive skills through mentoring, project-based learning, and internal training. Established and managed a Data Mining & Data Science community as a communication hub to share opportunities and knowledge, including competitions, online courses, workshops, and seminars, fostering collaboration and continuous learning among members.

Web Scraping - Research and Development 04/2025 - Present

Central Computer Improvement

Developed and maintained web scraping and crawling solutions for social media platforms (Instagram, Facebook) using TypeScript with tools such as Puppeteer, Axios, and Fetch API. Implemented account session handling to retrieve stable API responses, enabling reliable and efficient data collection. Successfully optimized crawling pipelines to achieve robust and scalable performance, supporting the organization's research and analytics needs.

1st Placed Leaderboard Kaggle Data Slayer 2025 11/2025 - 12/2025

Telkom University Purwokerto

I developed a landmark-based video analysis pipeline using MediaPipe and YOLOv8 for robust face, hand, and pose feature extraction, engineered geometric ratios (MAR, EAR, Hand Aspect Ratio), applied temporal frame aggregation, and trained an ensemble model (XGBoost, Random Forest, CatBoost) to achieve 1st place on the Kaggle Data Slayer 2025 leaderboard.

Finalist GEMASTIK XVIII Data Mining 09/2025 - 09/2025

Kemendikbudristek

Developed a fraud detection system for P2P lending platforms using a hybrid approach of Graph Convolutional Networks (GCN) and optimized ensemble learning (XGBoost, CatBoost, HistGradientBoosting). The model achieved an AUC score of 0.8330, outperforming several state-of-the-art baselines (e.g., GraphSAGE, TGN). This accomplishment demonstrates the ability to design scalable machine learning solutions for imbalanced, large-scale financial datasets, while contributing to Indonesia's financial technology independence.

10th Placed Leaderboard Kaggle Datavidia Competition 03/2025 - 04/2025

HMIF - Institut Teknologi Bandung ↗

Built a deep learning model to forecast daily food prices for 13 commodities across 34 Indonesian provinces. Integrated exogenous features. Evaluated multiple neural architectures (NHITS, NBEATSx, LSTM, TiDE, TSMixerx), with NHITS achieving best performance

3th Placed ADIKARA Data Mining Competition PRODIGI and FIF Telkom University Developed a hybrid deep learning architecture combining Convolutional Neural Networks (CNN) and Long Short-Term Memory (LSTM) networks to forecast multivariate food price indices across countries.	11/2024 - 01/2025
Implementation CNN for MNIST, MNIST Fashion Dataset Optimization Hyperparameter CNN Model Architecture with Keras Tuner	10/2024 - 10/2024
Finalist Olimpiade Jaringan Mikrotik 2023 Tingkat Nasional Citraweb Solusi Teknologi ↗ Olimpiade Jaringan Mikrotik SMK - TKJ,TJKT,SIJA organized by Citraweb Solusi Teknologi in Yogyakarta. This Olympiad is not just about competing, but also about learning and gaining new experiences.	10/2023 - 10/2023

EDUCATION

S1 Data Sains - Fakultas Informatika Telkom University - Sarjana (S1) GPA Cumulative 3.81	08/2024 - Present
Teknik Komputer dan Jaringan (SMK) SMK Negeri 2 Depok - Sekolah Tinggi Kejuruan	06/2021 - 03/2024

CERTIFICATES

MTCRE (MikroTik Certified Routing Engineer) Citraweb Solusi Teknologi	10/2023 - 10/2026
MTCNA (MikroTik Certified Network Associate) Citraweb Solusi Teknologi	10/2023 - 10/2026

SKILLS

Pitch Deck	Web Scraping / Crawling
Public Speaking	Team Leadership
Bussiness Plan	Network Engineering
Web Development (React, Tailwind, Vite)	Machine Learning and Deep Learning
Forecasting Specialist	Prompting Engineering
Research
